

PRODUCT DATASHEET

Electrical Protection

Product: Electrosoft™ Latex Electrical Insulating Gloves

Brand: PMOFS / InsulGrip

Product Description:

Premium quality latex electrical insulating gloves designed for electrical protection across a wide voltage range. Ideal for use in high, medium, and low voltage environments.

Compliance:

Standard	Description
EN 60903:2003	European standard for insulating gloves
IEC 60903:2002	International standard for electrical protection

Electrosoft Latex Electrical Insulating Gloves – EN Rated

- **Wide Voltage Protection:** Covers **Class 00 to Class 4** – suitable for **low to high voltage** applications.
- **Enhanced Durability:** Designed for use with **leather overgloves** to resist **cuts, abrasion, and tearing**.
- **Precision Fit:** Available in **multiple sizes** for comfort and flexibility.
- **Cut Edge Design:** Manufactured to **international safety standards**.
- **Reliable Performance** Provides excellent **electrical insulation** with high **dexterity and comfort**.

Protection Classes / Technical Specifications

Class	Voltage Use (AC)	Voltage Use (DC)
00	500V	750V
0	1,000V	1,500V
1	7,500V	11,250V
2	17,000V	25,500V
3	26,500V	39,750V
4	36,000V	54,000V

Applications

- Electrical maintenance
- Power distribution
- Industrial electrical work
- Energy sectors
